

### **Project Structure**

Date	10 October 2022
Team ID	PNT2022TMID00525
Project Name	Crude oil price prediction

### **PROJECT STRUCTURE**

- We are building a Flask Application which needs HTML pages stored in the templates folder and a python script app.py for server-side scripting
- app.py - contains the actual python code that will import the app and start the development server.
- IBM.ipynb - This is where you define models for your application.
- Crude\_oil.h5 - This is our model weights file that will be generated when the model is trained.
- static - contains static files i.e. CSS, Javascript, images.

- templates - This is where you store your HTML templates i.e. file1.html, file2.html □ requirements.txt - This is where you store your package dependencies.
